

Lorenzo Carlin

Computer Science Student | Competitive Programmer

Trento, Italy | lorenzocarlin273@gmail.com | +39 370 351 4142

[GitHub](#) | [Codeforces](#) | [LeetCode](#) | [Olinfo Training](#)

Profile

Computer Science student with national-level results in informatics and mathematics competitions. Strong foundation in algorithms, data structures, and competitive programming, with practical exposure to optimization, data science, and collaborative technical projects.

Selected Achievements

- **Silver Medal**, Italian Olympiad in Informatics (2024).
- **Gold Medal**, Italian Olympiads in Informatics in Teams (2023).
- Selected for the **Training and Selection Camp** of the Italian Olympiad in Informatics (2025), including five days of in-person activities and 50 hours of remote training.
- **Honorable Mention**, Italian Mathematics Olympiad (2025); **7th place**, Kangourou Mathematics Competition, Cadet category (2020).

Education

University of Trento

B.Sc. in Computer Science

Trento, Italy

2025 – Present

Liceo Scientifico “G. Galilei”

Scientific High School Diploma, Applied Sciences track

Trento, Italy

2020 – 2025

- Final grade: **100/100 with honors**; curriculum included a focus on artificial intelligence.

Technical Experience

Huawei Italy Summer Camp

Huawei Pisa Research Center

Pisa, Italy

2023

- Worked in a team to design a system for optimizing the allocation of limited research-center resources among multiple users.
- Developed and presented the solution during a 36-hour program with participants from the Italian Informatics Olympiads in Teams.

Artificial Intelligence Summer Camp

University of Trento

Trento, Italy

2024

- Applied data-science methods in a team to design a data-driven product and presented the outcome publicly at the end of the 30-hour program.

Competitive Programming

- Solved **496 tasks** on the Italian Olympiad in Informatics training platform, with 56,966 points and 1,382 submissions.
- Active profiles on Codeforces, LeetCode, and Olinfo Training; experienced with graph algorithms, dynamic programming, greedy methods, and advanced data structures.

Technical Skills

Programming

C/C++, Python; working knowledge of R, Java, SQL, HTML, and CSS

Tools

Git, Linux, L^AT_EX

Core areas

Algorithms, data structures, competitive programming, artificial intelligence, machine learning

Languages

Italian (native), English (Cambridge B2 First)

Leadership and Community

Scouting

2014 – 2023

Long-term participation in group activities, outdoor programs, and community service, developing responsibility, autonomy, organization, and teamwork.
